# INTRODUCING A FULLY INTEGRATED BUSINESS & ACCOUNTING SOLUTION

## SYSTEM OVERVIEW

Advanced Business Manager (ABM) has everything you need to manage your business activities, creating an environment where efficient workflow is maintained between all aspects of your business.

ABM links business functions together into a complete business management solution.

## FINANCIAL REPORTING

The ABM general ledger is fully integrated with all modules, meaning that ABM updates the general ledger automatically as transactions, such as sales and purchases, are processed.

Financial reporting information does not need to be archived or summarised at year end. ABM includes a wide variety of standard financial reports out of the box, and also allows you to create reports customised to your business needs.

- » Up to date financial reports available at any time with no batch processing required
- » Ability to run reports for any prior period or date range, providing complete flexibility for comparative reporting
- » Time savings due to using the comprehensive suite of standard reports
- » Much more

## SALES & PURCHASING

ABM's sales and purchases features cover the entire trading process, from preparing a quote or requisition, placing an order, delivering the goods or services and finally invoicing them.

- » You'll always know what orders are outstanding or overdue
- » Matching invoices to orders and checking they have been delivered is easy
- » Repeat sales or purchases can be quickly entered using previous orders
- » Much more

## STOCK CONTROL

ABM's stock control system provides multi-warehouse control, serial and batch tracking, sales kits and size and colour variations.

- » Up to date information of how much stock you have and where it is
- » Full traceability of serial and batch tracked items for warranty, quality or legislative requirements
- » Efficient handling of manufactured or kitted items that are made up in advance or as they are sold
- » Much more

## AUTOMATION

ABM provides a number of functions that can be run automatically as well as on-demand, including scheduled reports, automatic credit hold and release, notifications and system maintenance.

- » Reports and KPI bulletins can be delivered to your inbox without anyone having to spend time preparing the reports
- » Credit policies can be automatically enforced when customers exceed their credit terms, eliminating the need to review aged balance reports for problem
- » Staff can be alerted to potential problems such as customer credit, stock running out, job cost overruns or missing delivery dates - without having to look for them
- » Much more

## JOB AND PROJECT COSTING

ABM Job Costing manages the entire job process from preparing an estimate, recording time materials and other costs, using mobile applications as the job progresses, invoicing the customer and reporting on progress throughout the process.

- » Improved reporting of profitability by job or cost centre
- » Reduced time, wastage and improved accuracy recording costs
- » Cost overruns can be caught and managed before they become a problem

## MOBILE APPLICATIONS

A suite of integrated mobile applications for Android, iOS and Windows devices enables access to ABM wherever you are.

- » Immediate access to information, anytime, anywhere
- » Reduced use of paper based system
- » Improve efficiency by reducing the time to update information

## ECOMMERCE

ABM offers a range of integrated eCommerce packages to suit your budget. These provide an out-of-the-box, online retail or wholesale system. This is suitable for direct public sales or B2B (account) sales, with full customer enquiry and online payment functions.

- » Improve awareness of physical store locations
- » Promotes online and in store specials
- » Reduce time wastage by using more efficient order processing
- » Much more
