

SIX STEPS IN THE SOFTWARE SELECTION PROCESS

- 1. CLIENT BUSINESS ANALYSIS
- 2. INTERNAL REVIEW
- 3. FOLLOW UP CALL
- 4. ONLINE DEMONSTRATION
- 5. POST DEMO DEBRIEF
- 6. INVESTMENT SUMMARY

Structured Stock Size and Colours

Often referred to as a matrix, ABM offers structured stock functionality for businesses that sell product in a range of sizes colours and styles. This module allows you to buy and sell using a fast data entry screen and provides streamlined invoice layout to suit structured items. Analysis of reporting by style or colour is also available.

Warehousing

This module allows you to see a visual representation of your warehouses and nominate different bin location in each warehouse. All staff can easily see what stock is available in any location.

Individual Customer Price List

Using our Alchemex Reporting tools, easily automate the process of sending out updated customised price list for each customer. Each one lists all prices including special prices, special discounts, promotional prices, quantity price breaks, pack sizes and foreign currency pricing.

Retail Customer Price Scan Program

Allows your customers to take a product up to a scanning bay and scan any product to determine the price.

Loyalty Point Program

Nominate the promotional data range, the products and points available and the program will do the rest. Each invoice and statement list points earned and confirms the current points balance for the promotion.

Customised Sales Order Programs

Would you like to tailor the sales order program to suit your business process. ABM have written many sales order programs to meet your specific needs. Examples include product search by partial descriptions, product lists by group or category, barcode scanning and customised pantry lists for each customer. Tell us about your ideal scenario and we will create the solution for you.

Stock Management Solutions

NETSTOCK is a solution that helps companies reduce excess inventory and free up working capital while minimising stock-outs and increasing revenue. It provides visibility of inventory level and investment, produce quality forecasts and optimal replenishment recommendations.

Webshop Integration

Our webshop solutions are optimised for mobile devices, size and colours matrix as well as supporting multiple pack sizes and special pricing. This provides a consistent experience when placing orders regardless of the method used.

POS Integration for Retail and Warehouse Shop

Our software includes both wholesale and retail operation in the one package. All transactions are real time and there is no manual integration where joined systems need to be managed and reconciled by self.
