

PACK SIZES - UNITS OF MEASURE

Does your business sell products in Packs and Units?

Advanced Business Manager allows you to setup up to 4 different pack sizes for the same product. You can manage stock control for all pack sizes in one product.

You can buy and sell in units, kilos, litres, metres, cartons, inners, per 1000 or any combination you can think of.

Ajendico Support Team are here to help.

Download our [Free Support Bulletins](#) here on our website. If you need to chat, [Email Support](#) or **call us now on 02 9570 1966.**

UPDATE YOUR ABM PLAY DATA

Is your current play database really out of date? A play database is a great way to test out features of Advanced Business Manager prior to putting them in your live data.

- Test to understand how things work
- Document your workflow
- Train your staff before you Go Live
- No damage done to live data

Ajendico Support Team can update your play area for you. To contact us, simply

[Email Support](#) or call us now on (02) 9570 1966.

"TIP OF THE DAY"

Did you know you can be logged into two different databases at once. Double click the ABM icon and log in then select a company. Now go back and double click the ABM icon again. Make sure you use the same login name and password again but select a second company. Printing forms and reports will be available for the first database opened
